**EXAMINER INTERVIEW SUMMARY**

Sir:

Applicants' representative was contacted by the examiner by telephone on November 14, 2007. During the telephone interview, the format of dependent claim 260 was discussed.

Further, the examiner indicated that an obviousness-type double patenting rejection over U.S. Patent No. 6,741,868, which is the parent to the current application, currently bars the patentability of the current application. However, the examiner indicated that a terminal disclaimer would overcome this rejection, and that once a terminal disclaimer is filed, the claims would be allowed over the '868 patent.

Finally, Applicants' representative stated that an Information Disclosure Statement would be filed shortly.

Respectfully submitted,

/hae-chan park/
